

SAVE THE DATE

21st *SCOPE* Meeting

**International Symposium on
Skin Care in Organ Transplant Patients EUROPE**

8-10 November 2023

Welcome to Brussels

The "**SCOPE meetings**" have become major meetings for clinicians and basic scientists working in the challenging fields of cutaneous problems (e.g. skin cancer and skin infections) in organ transplant recipients. After fruitful meetings at venues all over Europe, we are now meeting in Brussels, Belgium, for SCOPE's 21 year meeting, from November 8-10, 2023.

The Congress will cover all aspects of skin problems in organ transplant patients and ways of intervention and treatment. Invited lectures will be given by experienced researchers in this specific field. The participants are invited to submit an abstract of which the most interesting will be selected for oral presentation. Aside from oral presentations there will also be ample time for informal contacts between clinicians and scientists who are involved in skin care in organ transplant recipients to exchange ideas and treatment options in this field. This exchange of knowledge is the key factor for innovative development in *SCOPE*.

Updates on this congress will be regularly provided on www.scopenetwork.eu

Alexandra Geusau, MD
President of SCOPE

Veronique del Marmol, MD, PhD
Local organizer

General information

Organizing committee

Alexandra Geusau, Vienna (AT) | **Veronique de Marmol**, Brussels (BE)
Ulrike Leiter-Stöppke, Tübingen (DE) | **Catherine Harwood**, London (UK)
Carla Ferrandiz-Pulido, Barcelona (ES) | **Mirjam Nägeli**, Zurich (CH)

Congress venue

Académie Royale de Médecine de Belgique - Rue Ducale 1, 1000 Bruxelles

The official congress language is English
