Mechanical power to guide ventilator settings. The theory and the practice

It's currently one of the most talked-about aspects of mechanical ventilation. What is it and should we limit it? If yes, how? Join us for lunch at the ESICM to hear what renowned experts have to say about mechanical power.

Mechanical power to guide ventilator settings: The theory and the practice

- ✓ Targeting mechanical power to protect the lung and prevent VILI (Prof. Luigi Camporota)
- ✓ Can automation help us limit mechanical power? (Dr. Jean-Michel Arnal)
- ✓ Should we set PEEP to prevent atelectrauma or to limit mechanical energy? (Prof. Francesco Mojoli)

Date: October 8, 2024
Time: 12.30–13.30
Room: #113, Level 1

Prof. Luigi Camporota
Speaker
London, UK

Prof. Francesco Mojoli
Speaker
Pavia, Italy

Dr. Jean-Michel Arnal
Speaker
Toulon, France

Prof. Marcelo P. B. Amato
Chair
São Paulo, Brazil
