‘Asks’ to the private sector in the response to COVID-19

The Strategic Preparedness and Response Plan and COVID-19 Strategy update outline public health measures needed to support countries to prepare for and respond to COVID-19. In this effort, the private sector has a critical role to play locally, nationally and globally. The following “Asks” have been prepared for businesses to take concrete actions.

Protect against COVID-19

Protect your stakeholders
The outbreak of the coronavirus (COVID-19) has introduced new challenges to the business environment, which call for a proactive response from leaders. It is important to take into account the well-being and interest of all stakeholders to help mitigate the impact of the crisis. The following action points and resources will help businesses to navigate the situation in an informed, responsible and practical way.

- Protect the health of your staff, community, service providers and clients by informing them about COVID-19 and WHO recommended protection measures at workplaces and towards external stakeholders
- Protect jobs and livelihoods to lower the impact of the crisis on people and the community
- Support WHO in managing the global infodemic and fighting mis-information

Protect your business
Businesses from all sectors are facing great challenges, including to their operations and solvency. The information below will further help position businesses to be more resilient.

- Put business continuity plans into action, in coordination with local/national authorities
- Prioritize supply chain continuity of essential health and non-health products (food, soap, etc.)
- Maintain essential support infrastructures and services (water, transports, electricity, hygiene and waste management, etc.)
- Protect jobs to retain skills and experience
- Act responsibly towards your suppliers and service providers

Engage/participate in the COVID-19 response

Essential supplies

- Produce, where possible, essential supplies according to official specifications, national laws, regulations
- Repurpose, where feasible, production facilities towards these essential supplies (e.g., personal protective equipment (PPE) from garment industry facilities, or hand sanitizer from fragrance industry facilities, etc.)
- Provide in-kind contributions – including goods and professional services (technology, expertise, transport, etc.) – towards the updated WHO COVID-19 Strategy (14 April 2020) and for the needs of health authorities
- Make supplies and services available and inform and coordinate your production and in-kind contributions with health authorities, UN or WHO focal points and other relevant stakeholders
